STUDENT TECHNOLOGY GUIDE / VERSION 1.0

# Student IT Services Manual

A quick reference for accounts, campus Wi-Fi, remote access, learning systems, printing, and support.

**Demo document:** Sample University is fictional. This manual was created solely to demonstrate a closed-domain question-answering project. It is not an official policy and must not be used for real account or security decisions.

## IN THIS GUIDE

- Student account and password reset
- Campus Wi-Fi and off-campus VPN
- Learning portal and assignment submissions
- Printing and technical support

For this demo, all service names, web addresses, hours, limits, and procedures are fictional sample values.

# 1. Student account and password

Your Sample University account provides access to the learning portal, campus Wi-Fi, library resources, and student email. Your username is your eight-digit student ID. Never share your password or one-time verification code.

## Sign in and multi-factor authentication

- Use your student ID and current password on university sign-in pages.
- Approve the multi-factor authentication (MFA) prompt only when you initiated the sign-in.
- If you receive an unexpected MFA prompt, deny it and contact the Service Desk.

## Reset a forgotten password

Visit **accounts.sampleu.example/password-reset**, enter your student ID, and complete identity verification using your registered recovery email. Choose a new password that you do not use on other websites. The reset link expires after 30 minutes.

> After five consecutive incorrect password attempts, sign-in is temporarily locked for 15 minutes. If the lockout continues after that period, contact the Service Desk.

## Account safety

- The university will not ask you to send a password by email.
- Sign out on shared computers and remove saved credentials from public devices.
- Report a suspected account compromise to **support@sampleu.example** as soon as possible.

# 2. Wi-Fi and off-campus access

## Connect to campus Wi-Fi

On campus, select the wireless network **SampleU-Student**. Sign in with your eight-digit student ID and university password, then approve the MFA prompt. The network may ask you to sign in again every 30 days.

- If the sign-in page does not appear, open a browser and visit **http://connect.sampleu.example**.
- Remove older saved SampleU-Student profiles if your password has changed.
- Do not use open guest Wi-Fi for university account access.

## Use the university VPN away from campus

The SampleU VPN is intended for off-campus access to licensed library resources and internal systems. Install the SampleU VPN client from **software.sampleu.example/vpn**, sign in with your student account, and approve MFA. Disconnect when you finish using the protected resource.

> The VPN is not required for the public learning portal or ordinary web browsing. VPN access is available to currently enrolled students.

## Connection troubleshooting

- Check that your device date and time are set automatically.
- Restart Wi-Fi, forget the saved network, and reconnect using your current password.
- If VPN sign-in fails twice, wait five minutes before trying again. Contact the Service Desk if the issue continues.

# 3. Learning portal and coursework

The SampleU Learning Portal is at **learn.sampleu.example**. Sign in using your student ID and university password. Course pages, announcements, reading materials, and assignment submissions appear in the portal.

## Submit an assignment

- Open the correct course and assignment before uploading your file.
- Accepted file types are PDF, DOCX, XLSX, PPTX, and ZIP. The maximum upload size is 100 MB.
- Select Submit, choose the file, and wait for the confirmation screen.
- Save the submission receipt shown after upload. A draft or upload-progress screen is not a submission receipt.

## Deadlines and updates

Deadlines are displayed in the time zone configured in your portal profile. The portal receipt shows the recorded submission time. If a course page and a downloaded copy differ, check the latest announcement or ask the course instructor.

> The Service Desk can help with sign-in, upload errors, and portal access. It cannot change grades, extend deadlines, or decide whether late work is accepted. Contact your instructor about course rules.

## If upload fails

- Confirm the file is smaller than 100 MB and has an accepted file type.
- Try a current browser and a stable internet connection.
- Take a screenshot of the error and contact support@sampleu.example before the deadline.

# 4. Printing and technical support

## Student printing

Students receive a sample monthly allowance of 50 black-and-white pages. Print jobs are released at a campus printer using your student ID card. Unreleased print jobs are deleted after 24 hours. This demo manual does not define color-printing charges.

- Check the printer name and page count before sending a job.
- If a job is stuck, cancel it in the print queue and resend once.
- For an unreadable or jammed printer, note the printer location and contact the Service Desk.

## Contact the Service Desk

Email **support@sampleu.example** or visit the Student Service Desk in Building A, Room 104. Sample walk-in hours are Monday to Friday, 9:00 a.m. to 5:00 p.m., excluding university holidays. Include your student ID, device type, the service affected, and a brief description of the error. Never include your password.

## Response and urgent issues

The sample target for a first email response is two working days. This is a target, not a guarantee. For a suspected account compromise, include **SECURITY** in the email subject and call the Service Desk during walk-in hours.

> This fictional manual does not provide emergency, medical, campus-safety, or real account-recovery guidance. Use your institution's official contacts for real situations.
